

UNICOM World Leaders Partner in Products and Solutions for Metallurgical Industry

Materials

- STOLLBERG - Casting Fluxes, Covering Compounds, Metallurgical Slags.
- LUNGMUSS – well known supplier of Taphole Clay, Runer Mixes and Special Mixes for Blast Furnaces. Also for any furnace instalation as lining and repair products.
- SMZ JELŠAVA – ramming, gunning, slagging, and parging mixes.
- IFGL – manufacturer of Specialised Refractorie Ceramic and requisite Operating Systems for the Steel Industry.

Measurement

- IMS - world's leading manufacturer of isotope, x-ray and optical dimensions measuring systems.
- MINKON - advanced technologies in the molten metal measuring and sampling sectors.
- KELK - Load cells for measuring roll force and tension, laser system for spead crop optimisation and width measurement.
- AMEPA - electromagnetic and optical solutions for slag detection

Equipment

- TMT – machines for the taphole area at blast furnaces, reduction furnaces and measuring BF technology.
- PAUL WURTH - from 1870 world leader in design and supply of full range of tehcnological solutions for iron & steel industry, and other metal sectors.
